Dry Fertilizer Storage ■ Bulk Liquid Fertilizer & Chemical Storage
Seed Warehousing & Treating ■ Flat Grain Storage ■ Workshops & Office Buildings

BULK GRAIN STORAGE

Greystone Construction offers design-build solutions for flat grain storage utilizing pre-engineered metal buildings and fabric buildings. Whether you are looking to store 500,000 bushels or 5,000,000 bushels of grain, we have solutions for you. Grain storage facility options include fill and reclaim conveyors up to 60,000 BPH, flush-floor or above-grade aeration systems, future expansion and more.

"We very much enjoyed working with the entire Greystone team. They have become the standard bearer of what we expect from construction companies going forward."

Blain Christianson, West Central Ag Services

DRY FERTILIZER STORAGE

Greystone offers design-build dry fertilizer storage and blending facilities utilizing engineered concrete/ wood buildings and fabric buildings. Our facilities are designed with options for spacious alleyways, elevated control rooms, expandable end walls, in-floor heat capabilities, multiple blending capabilities, liquid impregnation capabilities, options for receiving and load-out and more.

"Greystone provided a very knowledgeable superintendent from day one...They delivered a quality building using their own building crew and quality subcontractors."

Jason Frinack, CHS

"We required a quality building solution that could go up quickly in the dead of winter and be ready for business by May 1. Greystone made that happen with a fabric building solution."

Lane Mielke, Pinnacle Agriculture

LIQUID FERTILIZER, BULK CHEMICAL & SEED WAREHOUSING

Design-build solutions for liquid fertilizer, bulk chemical, and seed warehousing facilities from Greystone Construction are available with either pre-engineered metal buildings or wood-framed structures. Buildings include reinforced concrete, containment areas, tank size flexibility, diked areas, in-floor heat, office build-outs, loading docks, trench drains, restrooms and more.

"From start to finish, Greystone provided excellent service. They have knowledge and expertise and provided us with a high quality project. Everyone we dealt with was very pleasant and professional."

Trent Wadd, Crystal Valley Cooperative

"Greystone completed a chemical warehouse, office building and fertilizer storage facility for us. Greystone is able to work under extreme conditions and push hard to meet their customers' needs. They are good at what they do."

Greg Volk, Performance Agriculture

"From the bid process to project completion, Greystone covered all the details needed so myself and my staff could do our jobs on a daily basis. That alone is a key to a good contractor. I believe Greystone understands our business. It was a grade A+ performance."

Dan Sem, Dakota Agronomy Partners
